PROJECTS

Heart Disease Analysis

Implemented ECG procedures to assess cardiac health, pinpointing anomalies in heart rhythms and providing insights into its functional status.

Online Diagnostic Lab Management System.

Patients can register online, schedule appointments, and conveniently access their test results via the system. Doctors have the capability to submit test requests, review patient reports, and collaborate effortlessly with lab technicians and administrators. Within the system, lab technicians can promptly update test results, collect samples, and communicate efficiently with doctors and patients through secure messaging, notifications, and alerts.

ACHIEVEMENTS

1. I came second in the Techno Quiz during the 'Geek Seek - 22' college competition.
2. I secured second place in the Code-A-Thon event at 'Geek Seek - 22'.
3. I achieved the Runner-up status in Division-level competitions for Athletics, Cricket, and Kabaddi.
