## ACADEMIC PROJECTS & INTERNSHIPS :

### Project title: AC Repair System

**Description:** The AC Repair process is essentially the process of restoring an air conditioner to working order. Though each unit requires a unique approach to service, the general method involves inspecting the various components of the system, servicing what needs servicing and performing any repairs that are deemed necessary.

### Project title: Heart Disease Analysis

**Description:** Besides blood tests and a chest X-ray, tests to diagnose heart disease can include, Electrocardiogram (ECG or EKG). An ECG is a quick and painless test that records the electrical signals in the heart. It can tell if the heart is beating too fast or too slowly.

### Project title: Online Diagnostic Lab Management System.

**Description:** Patients can register online, book appointments, and easily access their test results through the system. Doctors can place test requests, view patient *reports*, The system facilitates seamless collaboration and communication among lab technicians, doctors, and administrators. Lab technicians can update test results, take samples, and communicate with doctors efficiently and will have patients through secure messaging, notification, and alerts.

**Internship Domain:** ‘Python Django’ training program at Bteq Ventures Private Limited.
